

EPA Arsenic Demonstration Projects

AdEdge Technologies, Inc. was selected by USEPA through an expert peer review process in cooperation with the individual host sites to conduct full scale arsenic treatment demonstrations using its Granular Ferric Oxide Adsorption Technology. The program is designed to gather further cost and performance data on commercially available, proven technologies which are candidates to become Best Available Technology (BAT) for arsenic removal. AdEdge is currently implementing the following 9 awarded projects treating individual or multiple wells ranging from 20 to 300 gpm.

Site / Location

System Model

- *Rimrock, Arizona* *APU-40LL system*
- *Rollinsford, New Hampshire* *APU-160 system*
- *Nambe Pueblo, New Mexico* *APU-160 system*
